Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement			
Novelty (N)	Claims	<u>1-20</u>	YES
	Claims		NO
Inventive step (IS)	Claims	<u>1-20</u>	YES
	Claims		NO
Industrial applicability (IA)	Claims	<u>1-20</u>	YES
	Claims		NO
2. Citations and explanations (Rule 70.7)			
1. This report makes reference to the following document:			
D1: US 2 781 122 A			
2. Document D1 discloses a device that is suitable for conveying and processing packages arranged on carrier elements, said device comprising a continuous conveyor belt 9, on which are disposed bottles 5, a star-shaped distributor 10 being provided adjacent to the conveyor belt, the rotational axis of which is perpendicular to the conveyor belt plane, two rotating clocked belts 11, 12 being provided behind the star-shaped distributor when viewed in the direction of conveyance of the conveyor belt, the clocked belts rotating in a plane that is parallel to the plane of the conveyor belt, each clocked belt comprising a strand facing the other clocked belt, and the mutually facing strands running parallel to one another at a distance which matches the width of the items to be conveyed (bottles 5).

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
-----------	---

The subject matter of claim 1 thus differs from the device according to D1 in that two advancing rollers are provided to the right and to the left of the conveyor belt, the axes of rotation of the rollers being perpendicular to the conveyor belt plane, in that the clocked belts have toothing on the mutually facing sides and in that the two outer sides of the carrier elements are provided with toothing.

The current invention can therefore be considered to address the problem of being able to position the items to be conveyed individually and precisely using the clocked belts.

The combination of features for solving the problem is neither disclosed nor suggested by the available prior art.

The subject matter of claim 1 is thus novel and inventive and satisfies the criteria in PCT Article 33(2) and (3).

3. The subject matter of method claim 9 differs from the method according to D1 by virtue of the following steps:

- processing of the package on the carrier element in the processing position when the clocked belts are stationary;
- transfer to the continuous conveyor belt.

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;  
citations and explanations supporting such statement

The current invention can therefore be considered to address the problem of being able to position the items to be conveyed individually and precisely using the clocked belts.

The combination of features for solving the problem is neither disclosed nor suggested by the available prior art.

The subject matter of claim 10 is therefore novel and inventive and satisfies the criteria in PCT Article 33(2) and (3).

4. Claims 2-8 are dependent on claim 1 and claims 10-20 are dependent on claim 9 and therefore likewise meet the PCT requirements for novelty and inventive step.
